

# Accessories and Services

# Integrated Total Solutions

At NJM Packaging we strive to build customer value by supplying an assortment of custom accessories and services designed to integrate into the turnkey packaging line. We deliver end-to-end project management with on spec, on time, on budget projects.

#### ▲ Biflow Accumulation Table

Helps create a buffer zone prior to the retorquing station for cooling of the caps. Allows operator to change label rolls on the labeler without stopping the line.

#### ▲ Corner Transfer Table

#### ▲ Turntables

Turntables offered in 3 configurations: infeed, buffer (in/out flow), accumulation. Available in 36" or 48" SS construction.

#### ▲ Straight Conveyor

Raised bed design, SS construction; 4½" delrin table top chain available in various lengths.

#### ▲ Curved Conveyor

#### ▲ AC Conveyor Control

#### ▲ Inspection and Vision Systems

Complete label inspection systems offered to verify lot #, expiry date, 2D bar codes, label presence, skew, and serialization.

## CLIENT TESTIMONY

### POMPEIAN

"Versatility and ease of change-over were among the most important benefits realized when this pressure sensitive labeler and a second one just like it were installed at Pompeian's vinegar and edible oils lines."

## CLIENT TESTIMONY

### GOLDEN HERITAGE

"The new labeler handles all containers with ease; and the no-tool changeover is quick and easy."

A Century of  
Packaging Expertise

#### ▲ Electrical Power Box

For the main service drops including the machine circuit breakers.

#### ▼ In Line Check Weigher

#### ▲ RFID Tagging

Offering a full-range of Print & Apply labeling machines capable of handling a wide variety of applications with e-Pedigree Serialization & RFID capabilities.

#### ▲ Project Management

Initiates projects for critical information, samples, and layouts. Continual evaluation of customer specs to be sure project remains on schedule.

#### ▲ Electrical & Pneumatic Conduit

SS construction for clean and organized passage of electrical and air supplies. Ideal for turnkey lines.

#### ▲ Desiccant Pouch Dispenser

#### ▲ E-Stop Line Control

Mushroom push buttons at key locations for operator quick access should a safety event occur. The line control module assures all machines are linked together.

#### ▲ Validation

Provide validation & documentation for pharmaceutical regulatory requirements.

#### ● OEE

Overall Equipment Effectiveness: Automated solutions for gathering and analyzing production data.

## CLIENT TESTIMONY

### NOW FOODS

*"NJM Packaging was able to integrate 12 different vendors in a turnkey line for us. The line was delivered on time, on budget, and running sellable product within 5 days."*

#### ▲ Lexan Dust Covers

Protects open containers from dust debris prior to capping machine.

#### ▲ Belt Transfer System

Used to eliminate dead plates from conveyor-to-conveyor. Positive transfer holds containers for bottom coding.
