Unscramble It, Count It, Fill It, Cotton It, Cap It, Label It, Code It, Serialize It, Print It, Inspect It, Line Integration . ProMach Pharma Solutions is comprised of two long-standing companies, NJM and WLS. We offer over a century of packaging experience designing, manufacturing, integrating and supporting the most sophisticated and advanced pharmaceutical and medical packaging solutions in the marketplace. Our new technologies, combined with other ProMach brands offerings such as Zalkin capping machines, will meet the most challenging requirements with minimal downtime, higher productivity, and true pharmaceutical packaging performance, with built-in compliance.

SOLID DOSE & LIQUID LINE PACKAGING WITH LINE INTEGRATION

NJM is a trusted automated packaging systems manufacturer, integrator, and support resource. We offer a broad range of technology, specializing in the needs of pharmaceutical, nutraceutical/vitamin, and personal care product packagers.

NJM offers a unique combination of industry-leading manufacturing and line integration expertise, backed by exceptional support and over a century of customer successes. One-stop packaging solutions source offers expert knowledge and experience from the earliest stages of planning through implementation and production, coupled with a deep understanding of the entire production line, processes and logistics. We also supply quality packaging line equipment from other leading manufacturers, enabling us to provide fully integrated lines and serialization solutions. NJM provides custom design, build, engineering, and research and development capabilities through the ProMach Innovation Center.

PRESSURE SENSITIVE LABELING WITH LABEL CODING & PRINTING

WLS (Weiler Labeling Systems) is a leader in the supply of pressure-sensitive labeling equipment to the pharmaceutical and medical device packaging markets, as well as the personal care and consumer markets. We manufacture rotary and in-line trunnion labeling machines for bottles, vials, ampules, syringes and auto-injector devices, as well as label coders and printers, and vial coders.

With nearly three decades of experience in providing labeling, coding, inspection, and precision-manufactured systems, WLS is at the forefront of delivering customized solutions backed by a culture of unwavering customer care. WLS provides customer care, while enhancing line speed, quality and efficiency.

Pharma Product Brand Capabilities

- **Project Management**

Experts in the packaging line process, we will provide full project management to identify and manage the project from specifying the correct machine for the application to designing and building the equipment while watching for any pitfalls inherent to your project.

- **ProMach Innovation Center (PMIC) - Engineering customization**

PMIC distinguishes itself from the integrators that exist in the industry by its capacity to design automated solutions that require custom mechanical designs and system controls.

- **Serialization**

We provide the total solution for your serialization needs in partnership with serialization software providers. We offer a full range of equipment to comply with serialization and aggregation requirements; inspecting/coding/associating serialized labels and tracking code on the container and in the case to comply with serialization implementation.

- **End-of-Line Integration**

Single source for turnkey, customer-driven, integrated systems. Supplying integrated systems that include our machinery allows us to minimize costs and leverage our expertise to ensure all integrated solutions are ideally suited for each application.

- **Superior Support**

Our Sales and Service Departments assure responsive and comprehensive technical assistance in solving your packaging issues, servicing your equipment, and providing a full line of compatible systems supplies.

- **ZPI Line Monitoring**

Software-based system providing day-to-day production management support and real time line monitoring and alerts to accelerate downtime troubleshooting.

- **Third Party Vendor**

We provide full line integration by partnering with third-party vendors in order to offer a fully-integrated packaging line. We serve as North American supplier for two leading European firms.

- **Dara Pharma** is our partner for Liquid Aseptic Filling/Closing Systems designed for the pharmaceutical and biotechnology industries.
- **Cremer** Tablet Counting provides robust construction for solid dose tablet or capsule filling representing a new modular concept with state-of-the-art technology producing guaranteed outputs.
